Brenda:

I just talked with (b) (6) and she indicated that whatever you guys are doing today the odor being generated is bad. Can you check this out?

Thanks

Gary:

Happy New Year to you.

We are doing the second phase of sampling. The pumping was to remove water from the asphalt area on the school side so we could get a drill rig in. We haven't removed water from the tank containments since before the holidays. We removed about 12 inches then so we didn't have to deal with any weather and emergency removals during the last two weeks of the year.

Thanks
 Brenda

Brenda

Happy New Year. I received a call from (b) (6) interested in what activities are currently ongoing as she hears pounding and pumping.

Can you tell me exactly what is happening? I assume you are doing more sampling and removing water to Lonestar Ecology.

Gary Moore
